

Description of the study programme **Odontology**

Study Programme "Odontology" for foreign students, Plan for Academic Year 2013/2014

Study Programme "Odontology", Plan for Academic Year 2013/2014

Study subjects and credits

Study subjects and credits for foreign students

Faculty delivering the programme	Odontology
Programme data <i>national code</i> <i>field of studies</i> <i>branch of studies</i> <i>duration in years</i> <i>scope of the programme</i> <i>mode of study</i>	601A40002 Biomedical sciences Dentistry 5 years 300ECTS Full-time
Qualification degree/professional qualification to be awarded	Master of Odontology and qualification of Doctor Odontologist
Cycle	Integrated
Requirements for admission	Secondary school education
Other details of the programme	The aims of the Odontology Programme are the following: 1) to educate and train odontologists meeting the requirements recognized in the European Union; 2) to create possibilities for acquiring the qualification of an odontologist, granting the right to provide healthcare services; 3) to develop a personality capable of understanding and accepting changes in the society, and capable of functioning in a democratic society; 4) to foster interest in the novelties of the science and practice of odontology; 5) to develop creative, scientific, and critical thinking, and the sense of intellectual satisfaction from studies or work; and 6) to develop the ability to retain sufficient professional competence throughout the life-long learning period. These aims of the Odontology Programme are directly related to the mission of the Programme – to educate and train odontologists who could cooperate with other healthcare specialists for ensuring individual and public health. The aims of the

	Programme very clearly define the graduates' readiness for professional individual activity of an odontologist, and for activity in research institutions, in state odontological/healthcare institutions, and in other odontology-related spheres of health promotion.
Students' mobility	ERASMUS exchange programme
Access to further study	Postgraduate education studies within selected area in dentistry. Doctoral studies.
Assessment of study results	Colloquium, case history, examination, student's independent work (project), writing and defending thesis, final examination
